Summary

Frontend Engineer with 2+ years of experience building and maintaining enterprise ERP and SaaS applications using Vue.js, Nuxt.js, React.js, TypeScript, and Inertia.js. Experienced in leading frontend features, contributing to technical decisions, mentoring developers, and building scalable, maintainable web applications. Experienced in leveraging AI coding tools and agents throughout the software development lifecycle, from repository analysis and technical planning to implementation, code review, and documentation. Strong focus on reusable component architecture, performance optimization, testing, SEO, and delivering responsive, pixel-perfect user experiences.

Experience

Numo Training - Frontend Developer

May 2025 - Present

- Delivered 40+ production features across six ERP modules: HR, CRM, Platforms, Settings, Tickets, and Executive Dashboard.
- Led frontend development for the Numo Medical project, contributing to technical decisions and owning the implementation of major product features.
- Led the frontend development of the Certificate Template Builder and Approval Letters features, from implementation through integration with backend services.
- Resolved 80+ bugs and delivered continuous improvements across multiple ERP modules, enhancing application stability, usability, and maintainability.
- Designed and implemented 5+ reusable components to improve consistency and reduce duplicated UI implementation across the application.
- Built responsive, pixel-perfect interfaces from Figma designs with full RTL/LTR and multilingual (i18n) support.
- Implemented and tested frontend functionality using Vue Test Utils and Vitest, while applying performance optimization techniques including lazy loading and code splitting.

SolutionPlus - Frontend Developer

Apr 2024 - Apr 2025

- Led frontend development for the IFTMena platform, delivering responsive and maintainable interfaces for the International Federation for Travel.
- Contributed to the migration of multiple production applications from Vue 2/Nuxt 2 to Vue 3/Nuxt 3, improving maintainability and aligning the codebase with modern framework standards.
- Mentored frontend interns through onboarding, technical guidance, code reviews, and development best practices.

- Implemented reusable UI components and integrated REST APIs across the OTAS ecosystem.
- Worked on SEO optimization for Nuxt applications, leveraging SSR and frontend performance best practices.
- Collaborated with cross-functional teams in Agile/Scrum environments and followed Git Flow for development and release workflows.

Algoriza - Frontend Intern

Oct 2023 - Dec 2023

- Developed Dream Place, a room booking web application using Vue.js, Pinia, Tailwind CSS, and third-party APIs.
- Built responsive, reusable user interfaces and integrated APIs to support the application's booking workflows.
